

— ONE PLATFORM · EVERY LEARNER · AFRICA FIRST

Education in sync with Africa's future.

StudySync unifies AI-powered self-study, verified curricula, human tutors and whole-school intelligence into a single Learning Operating System — built for ZIMSEC, Cambridge, NSC and IEB learners from Form 1 to A-Level.

- AI Study Engine

- Live Online Tutoring

- Past-Paper Library

- School Workspaces

- Guardian Transparency

The Learning Operating System

Every lesson, tutor session and quiz — one connected record of mastery.

PHOTO SOLVER

Africa will not watch the AI revolution from the sidelines.

Across the world, classrooms are being rebuilt around data, personalisation and artificial intelligence. StudySync exists so that African learners are not spectators of that shift — but its front row. We digitise the syllabi our students actually sit for, then wrap them in the same calibre of AI tooling found anywhere on earth.

Built on African curricula, not imported ones

ZIMSEC Forms 1–6, Cambridge Grade 8 to A-Level, and South Africa's NSC & IEB Grades 8–12 — every subject mapped topic-by-topic with examiner-style objectives and assessment weightings.

AI woven through everything

Generative AI drafts study plans, grades structured answers, explains photographed problems step-by-step, flags weak topics and adapts revision — governed by quotas, human verification and audit trails.

Learning that travels

A fast, installable web app that works on the devices families already own — phone, tablet or shared laptop — with lightweight pages designed for real African bandwidth.

“The learners who master AI-assisted study today are the engineers, doctors and founders Africa needs tomorrow. Our job is simple: make sure no student is left behind because of where they study.

THE STUDYSYNC MISSION

A personal AI department for every learner.

StudyMode turns a syllabus into a living study companion. Pick your curriculum, grade and subjects once — StudySync loads verified topic maps and builds an adaptive plan around your real exam dates.

Adaptive learning engine

Mastery is tracked per topic and per concept. The plan re-sequences itself daily around what you're strong at, what's slipping, and how many days remain to the exam.

Photo Solve

Photograph any problem — the AI reads it, solves it step-by-step in exam-marker style, then generates practice variants so the method sticks. Full solve history included.

Mock exams with AI grading

Timed, section-based mock exams built from your syllabus weightings. Structured answers are AI-graded with marks, examiner feedback and model answers — plus exam-readiness scoring.

Flashcards & active recall

Auto-generated flashcard decks and spaced active-recall sessions per topic, with quizzes that adapt difficulty as your mastery climbs.

Insight, not guesswork

Weak-topic alerts, concept mastery breakdowns, mastery history charts, exam countdowns, streaks, achievements and leaderboards keep motivation and evidence in one place.

MASTERY YOU CAN SEE

Verified tutors, matched by subject, level and evidence.

AI handles the repetition; people handle the breakthroughs. StudySync's tutoring marketplace connects learners to vetted tutors across every curriculum we support — booked, paid and reviewed inside the platform.

Vetted tutor onboarding

Tutors complete a structured onboarding wizard — qualifications, subjects, levels and rates — and pass verification before they can teach a single lesson.

Smart matching & topic rankings

Tutors are ranked per topic from real outcomes, so a learner struggling with, say, Quadratic Functions is matched to the tutor who moves that exact needle.

Bookings, lessons & follow-through

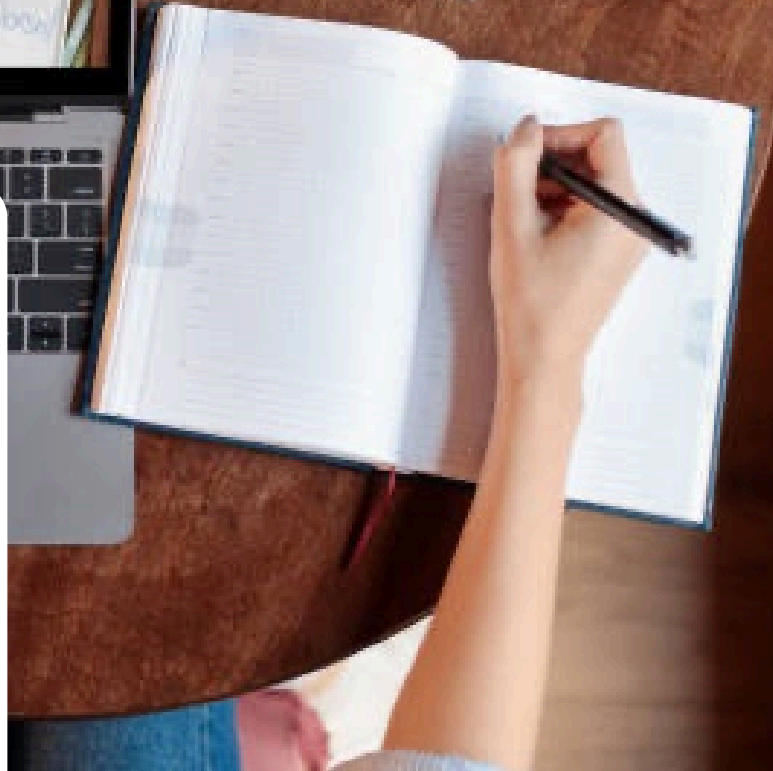

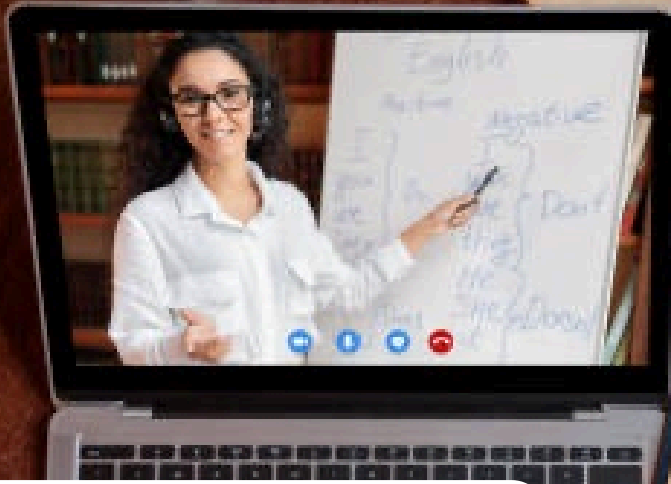

In-app booking management, live online lessons, and lesson-reinforcement prompts that push what was taught straight into the learner's StudyMode plan.

Fair, transparent payments

Pay-as-you-go or bundled lessons with clear pricing, receipts, and an admin-managed refund process — no envelope economics.

LIVE 1-ON-1 LESSONS

Past papers and syllabi, organised the way examiners think.

No more hunting through WhatsApp groups for a blurry 2019 Paper 2. The StudySync library is a curated, metadata-rich archive of past papers and official syllabus documents, searchable by curriculum, subject, year, session and paper number.

Curated past-paper archive

Papers carry full metadata — board, level, year, session, paper and variant — so revision by paper type or by topic takes seconds, not evenings.

Protected document streaming

PDFs stream securely inside the app with access control, keeping the library sustainable and the content protected.

Connected to StudyMode

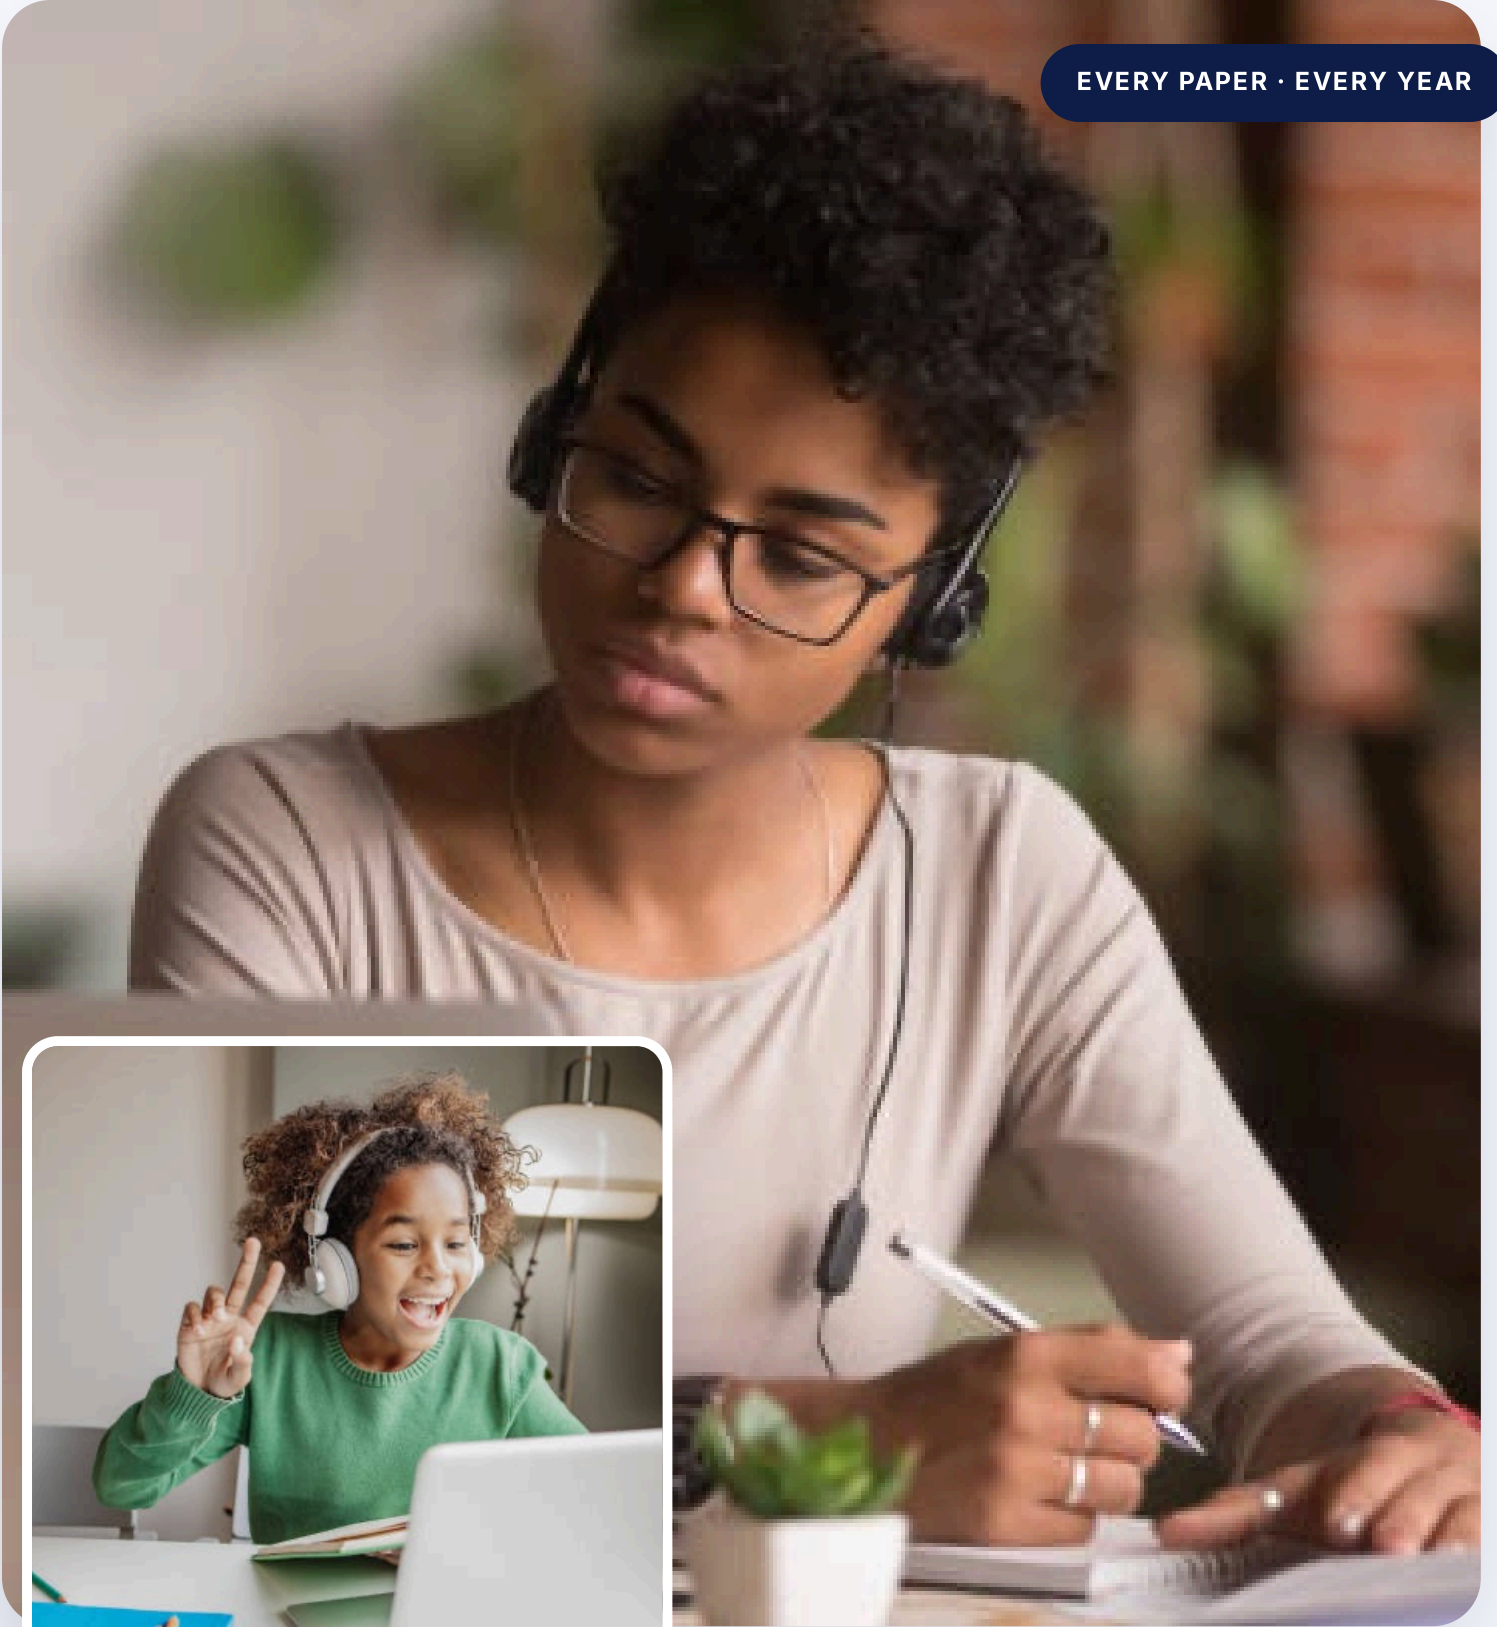

Library content feeds mock exams and practice sessions, so past-paper work counts toward the same mastery record as everything else.

Verified curriculum templates

240+ subject-by-grade syllabus maps across ZIMSEC, Cambridge, NSC and IEB — human-verified topic trees with objectives, prerequisites and assessment weightings.

EVERY PAPER · EVERY YEAR

Give every teacher a command centre, every head a dashboard.

StudySync school workspaces bring the whole institution onto one operating picture — cohorts, classes, teachers, tutors, learners and guardians, each with the right view and nothing more.

School workspaces & cohorts

Set up campuses, grade cohorts and classes with role-based memberships — owner, admin, teacher, tutor, student, guardian — and invitation-based enrolment.

Teacher Command Centre

A class-scoped view of risk, mastery and interventions: see which learners are slipping on which concepts before the test says so, with proposed plan changes ready to approve.

School Admin Console & SAIL

Whole-school analytics, allocations, verifications and automation controls — schedule, run and audit learning-ops jobs across the workspace.

Curriculum import for departments

Science and specialist departments can import their own verified topic maps through the admin import panel, keeping school-specific schemes of work in sync.

One brain connecting school, tutor and home.

Today, a learner's education is split across silos: the school knows the term marks, the private tutor knows the weak spots, the parents know the mood — and none of them talk. The LOS is StudySync's answer: a shared, permissioned record of mastery that closes the gap between school teaching and private tutoring.

A single mastery record

Every quiz, mock exam, tutor note, flashcard session and recall attempt lands as evidence in one concept-level mastery graph — the same graph the school, the tutor and the AI all read.

Interventions, not autopsies

The LOS detects risk early and proposes targeted interventions — concept re-teach, guided practice, prerequisite repair, exam sprints, consistency recovery or tutor escalation — before results collapse.

The gap, closed

When the tutor sees what the teacher taught, and the teacher sees what the tutor fixed, private lessons stop repeating school and start compounding it. Less duplicated cost, faster progress, no blind spots.

Mastery intelligence

Weakest-concept surfacing with recent evidence attached, exam-readiness scoring, and class kernels that mirror the learner's LOS for teachers — read-only, privacy-safe.

Automated learning ops

Workspace automation schedules recurring jobs — guardian digests, readiness recalculations, intervention sweeps — with a full audit log of every run.

Guardians in the loop

Guardian views and weekly digests translate the mastery graph into plain language: what improved, what needs attention, and what the plan is — proof of progress, not promises.

StudyMode practice

Weakness detected

Tutor targets it

Mastery evidence logged

Guardian sees proof

Trust is a feature. We engineered it in.

Minors, money and data share this platform — so accountability isn't a policy page, it's architecture.

Guardian oversight by design

Guardian emails are captured at onboarding; weekly reports and the guardian portal show real study activity, mastery movement and tutor sessions.

Privacy-first data handling

Student emails and personal fields are kept private with row-level security; teachers and tutors see only class-scoped, permissioned views.

Verified adults only

Tutors pass identity and qualification verification before teaching; schools verify staff through workspace membership approvals.

AI with guardrails

AI usage is quota-managed and logged; curriculum content is human-verified before it's trusted; sensitive science content follows a verified-import-only policy.

Transparent money

Clear plan pricing, in-app payment records, and an auditable admin refund workflow — every transaction accounted for.

Audited administration

Role-based admin access with security and audit pages; automation jobs, verifications and interventions all leave a trail.

Choose how you learn. Change any time.

AI Study

Moderate or Premium tiers

- ✓ Full StudyMode: plans, quizzes, flashcards
- ✓ Photo Solve & AI chat tutor
- ✓ Mock exams with AI grading
- ✓ Mastery analytics & guardian reports

MOST POPULAR · COMBO

AI + Tutoring Combo

AI tier + weekly live lessons

- ✓ Everything in AI Study
- ✓ Scheduled lessons with verified tutors
- ✓ Lessons-per-week you control
- ✓ The full LOS loop: tutor ↔ AI ↔ school

Tutoring Pay-As-You-Go

Book lessons when you need them

- ✓ Verified tutor marketplace
- ✓ Topic-ranked tutor matching
- ✓ In-app booking & secure payment
- ✓ Lesson notes feed your mastery record

— JOIN THE MOVEMENT

The future of African education won't wait. Neither should you.

Learners, tutors, schools and guardians — there's a place for each of you inside StudySync. Set up an academic profile in minutes and let the Learning Operating System take it from there.
